

NBA Team Value Analysis — Payroll vs Performance (2025–26)

Cost per Win by Team

\$5.7bn	\$7.0M	\$4.0M	\$13.3M
Total Payroll	Average Cost per Win	Lowest Cost per Win	Highest Cost per Win

Insights

- Teams such as the **Thunder**, **Pistons**, and **Spurs** deliver strong value relative to spending, ranking as the most cost-efficient teams in the league.
- Teams such as the **Kings**, **Pacers**, and **Nets** show poor cost efficiency, spending significantly more money per win than the league average.
- The scatter plot highlights clear overperformers who win despite modest payrolls and underperformers who struggle despite heavy spending.
- Cost per Win reveals large disparities in how effectively teams convert payroll into on-court success, emphasizing the importance of smart roster construction and financial efficiency.
